

## Statement on REACH

(Registration, Evaluation, Authorisation and Restriction of Chemicals)

We, Memmert GmbH & Co.KG, develop, manufacture and distribute electrical appliances for thermotechnical, medical and laboratory applications. We do not produce or import any substances or preparations subject to REACH.

According to REACH, we are a *downstream user*.

The products distributed by us are *articles* which do not contain any substances of concern and which do not release substances when used under conditions of the intended use. For this reason, we are not subject to registration obligations and do not have to create safety data sheets.

Nonetheless, we are intensively monitoring the implementation of REACH requirements of our suppliers – in our own interest and to guarantee a high level of product safety for our customers. We are in close contact with our suppliers of chemical substances, raw materials as well as operating and auxiliary materials for the production and processing of our products. If these conditions change, we will immediately inform our customers.

In addition, we have established a company culture which focuses on the needs of people and of the environment. With the consistent development of energy-efficient and long-lasting appliances, we do everything to fulfil our responsibility to our customers, society and the environment.
