

## Memmert, a world market leader in the production and development of climatic chambers from Germany, has settled in Changshu

*Schwabach, January 2023.* Memmert Group, a world leading company in the production and development of climatic chambers with a long history in its industry, has been deeply rooted in the Chinese market for more than ten years. Sold through several international offices such as in China, USA, India, Slovakia, and Russia hundreds of thousands of Memmert products have been permanently in use for decades in over 190 countries all over the globe.

### **2023 is destined to be an extraordinary year.**

On the eve of the 90th anniversary of Memmert Group, it made a major strategic decision to invest and establish its first overseas manufacturing factory, "Memmert Equipment Manufacturing (Changshu) Co., Ltd.", in Changshu, Jiangsu.

The establishment of this new manufacturing factory can realize the large-scale production in China, through the introduction of advanced production technology from the German headquarter. Follow the trend of vigorous development of China and the Asia Pacific market, and actively promote the iteration of new technologies and products based on the introduction of existing mainstream product lines. The new factory in China will inherit the unique craftsmanship spirit of "Memmert", guarantee the German quality of products, and provide customers with the unique expert services of Memmert.

With the establishment of the manufacturing facility in China, Memmert intends to manufacture products for the Asian market only, to shorten delivery times, reduce emissions from transportation and further strengthen supply chains.
