

# **UF750m**

The heating oven Um is a Class I medical device.

This universal oven made of high-quality hygienic, easy to clean stainless steel feaves nothing to be desired in terms of ventilation technology, control technology, overtemperature protection and perfectly tuned heating technology.

Setting accuracy temperature vpt o 99.9 °C: 0.1 / from 100 °C: 0.5  Setting temperature range	Temperature	
Setting temperature range	Working temperature range	at least 5 (UN/UNplus/UNm/UNmplus) or 10 (UF/UFplus/UFm/UFmplus) above ambient temperature to +300 $^{\circ}\text{C}$
Control technology Language setting German, English, Spanish, French, Polish, Czech, Hungarian ControlCOCKPIT SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation Fan torced air circulation by 2 quiet air turbines, adjustable in 10 % steps Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection cla 1 according to DiN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment Works calibration certificate Calibration at +160°C Door fully insulated stainless steel doors with2-point locking (compression door lock)	•	up to 99.9 °C: 0.1 / from 100 °C: 0.5
Control technology Language setting German, English, Spanish, French, Polish, Czech, Hungarian  ControlCoCKPIT SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection cla 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment Works calibration certificate Calibration at +160°C Lully insulated stainless steel doors with2-point locking (compression door lock)	Setting temperature range	+20 to +300 °C
ControlCOCKPIT SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation  Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethemet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection claid a according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment Works calibration certificate Calibration at +160°C Door fully insulated stainless steel doors with2-point locking (compression door lock)	Temperature sensor	1 Pt100 sensor DIN class A in 4-wire-circuit
ControlCoCKPIT   SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display	Control technology	
TFT-colour display  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation  Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection cla 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Tould in sulated stainless steel doors with2-point locking (compression door lock)	Language setting	German, English, Spanish, French, Polish, Czech, Hungarian
Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation  Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection clad 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	ControlCOCKPIT	
Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation  Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection cla 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Ventilation  Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection cla 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	Function SetpointWAIT	the process time does not start until the set temperature is reached
Ventilation Fan forced air circulation by 2 quiet air turbines, adjustable in 10 % steps Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	Calibration	three freely selectable temperature values
Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	adjustable parameters	
Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  fully insulated stainless steel doors with2-point locking (compression door lock)		forced air circulation by 2 quiet air turbines, adjustable in 10 % steps
Communication  Documentation programme stored in case of power failure  AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	Fresh air	Admixture of pre-heated fresh air by electronically adjustable air flap
Programming  AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection clar 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system  for fault analysis  Standard equipment  Works calibration certificate  Calibration at +160°C  fully insulated stainless steel doors with2-point locking (compression door lock)	Vent	vent connection with restrictor flap
Programming  AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection clar 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system  for fault analysis  Standard equipment  Works calibration certificate  Calibration at +160°C  fully insulated stainless steel doors with2-point locking (compression door lock)		
AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection claim 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)		
interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control     adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system  for fault analysis  Standard equipment  Works calibration certificate  Calibration at +160°C  Door  fully insulated stainless steel doors with2-point locking (compression door lock)		
Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system  for fault analysis  Standard equipment  Works calibration certificate  Calibration at +160°C  Door  fully insulated stainless steel doors with2-point locking (compression door lock)	Programming	interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software
Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Autodiagnostic system  for fault analysis  Standard equipment  Works calibration certificate  Calibration at +160°C  Door  fully insulated stainless steel doors with 2-point locking (compression door lock)	Safety	
Autodiagnostic system for fault analysis  Standard equipment  Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	•	adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature
Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)	Autodiagnostic system	for fault analysis
Works calibration certificate Calibration at +160°C  Door fully insulated stainless steel doors with2-point locking (compression door lock)		
Door fully insulated stainless steel doors with2-point locking (compression door lock)	Standard equipment	
	Works calibration certificate	Calibration at +160°C
Internals 2 stainless steel grid(s), electropolished	Door	fully insulated stainless steel doors with2-point locking (compression door lock)
	Internals	2 stainless steel grid(s), electropolished

## Stainless steel interior

Dimensions	$w_{(A)} \times h_{(B)} \times d_{(C)}$ : 1040 x 1200 x 600 mm (d less 39 mm for fan)
Interior	easy-to-clean interior, made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
Volume	749
Max. number of internals	14
Max. loading of chamber	300 kg
Max. loading per internal	30 kg

## Textured stainless steel casing

Dimensions	w <sub>(D)</sub> x h <sub>(E)</sub> x d <sub>(F)</sub> : 1224 x 1720 x 784 mm (d +56mm door handle)
Installation	on lockable castors
Housing	rear zinc-plated steel

#### **Electrical data**

**Voltage** 400 V and 3x 230 V w/o neutral, 50/60 Hz approx. 7000 W **Electrical load** 

## **Ambient conditions**

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II
Pollution degree	2

# Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 1330 x 1910 x 1050 mm
Net weight	approx. 217 kg
Gross weight carton	approx. 288 kg

## Standard units are safety-approved and bear the test marks
